# Regionalwert AG

A "Regionalwert-AG" offers a financing model based on citizen shares for local/regional sustainable businesses active in farming, processing, trade and catering, thus supporting the regional and organic food value chain.

- connecting diverse players along the value chain of food products with shareholders
- by being a shareholder and consumer at the same time, people co-decide over the food they consume and its production process
- funding options for start-up farms and farms transitioning to organic agriculture
- regionally closed economic cycles positively affect the job market
